

Regulator 510 N2 Pressure 0-10 Bar

Item No.: 211213211

Product information

A single stage regulator for nitrogen can reduce the inlet pressure from 200bar to any pressure between 0 and 10 bar. Gas regulators should be replaced with maximum 5 years intervals as a rule, because internal seals and membranes will deteriorate with time. Faulty, old or corrodes regulators should be replaced and repairs should never be attempted on them.
