Ballast Water Test Kit

Item Code: 4867 - Ballast Water Test Kit No.1

Item Code: 4868 - Ballast Water Test Kit No.2

Unimarine Ballast Water Test Kit consist of two cases: Ballast Water Test Kit No.1 & Ballast Water Test Kit No.2 and is a complete Portable Ballast Kit according to IMO regulations.

Ballast Test Kit No.1 is a **manual** testing process as per attached Literature.

Ballast Test Kit No.2 is a light, highly durable and handheld Indicative Monitoring test kit (Fluorometer) which checks the Algae (Chlorophyll) and Plankton in water. Attached is the accompanying literature with all details needed.

Advantages of our Kit:

Unlike other kits that require additional kits for complete testing, the Unimarine test kit No.1 covers the **complete testing** including *Vibrio cholera test* and the *Enterococci tests* ("Enterolert").

Complete Water Safety, No Extra Costs!
