

URICLEAN HD DRAIN PIPE CLEANER

DESCRIPTION

Uriclean HD Drain Pipe Cleaner is formulated of organic acids and corrosion inhibitors to keep clean from scales. Inorganic scale consisting of uric stone, phosphates and hardness salts will restrict flow and may finally clog the pipes completely if not treated. Uriclean HD Drain Pipe Cleaner is non-corrosive and does not harm any materials in the system, though it should not be used in galvanized systems. It will not contribute to foaming in the sewage treatment plant.

Uriclean HD Drain Pipe Cleaner is acidic, and may therefore harm the biological activity in sewage treatment plants if overdosed. It should therefore be fed to the system only by the use of automatically controlled dosing stations.

DIRECTIONS FOR USE

To remove existing scale, feed Uriclean HD Drain Pipe Cleaner daily at a rate of 1.2 - 1.4 litres per day per dosing station. When the scale has been removed, change from daily to weekly dosage with the same dosage rate to maintain the system clean.

Dosage is calculated for abt. 8-10 toilets, the dosage should preferably be injected at the beginning of every branch/line, so that the whole vacuum pipe is treated.

ADVANTAGES

- Liquid scale remover for automatic dosing
- Suitable for use in all marine sanitary and sewage treatment systems
- Non - corrosive
- Cleans and keep clean vacuum toilet systems for inorganic scales

Code: 161161336

URICLEAN HD DRAIN PIPE CLEANER

liquid treatment used to remove build up of inorganic scale in vacuum toilet piping systems

PRODUCT CHARACTERISTICS

Appearance: clear
Density: 1,2

Form: Liquid
pH: 11, in 20% solution
