

Tig Torch T-150 W.DIX 25 Connector

Item No.: 361362321

Product information

The 4-meter cable/hose package includes separate welding cable and gas hose, allowing for easy connection of extensions. A standard DIX 25 connector is attached to the welding cable, while the gas connection directly fits onto the Argon regulator or standard right-hand threaded screw couplings for gas hoses. The torch is equipped with an on/off switch and screw type gas valve.

Features

- The torch is designed to handle a full 150A welding current at a 100% duty cycle. Higher currents can be used at lower duty cycles.
- A screw-type gas valve fully opens with just a ¼ turn, allowing for easy gas flow control.
- Being gas cooled, the torch has lower weight than water cooled torch.

Benefits

- Simple to use for repair and maintenance tasks in any position.
- The handle provides a firm grip and minimizes heat transfer to the welder's hand.
- A remote amperage control can be attached to the TIG torch using Velcro straps, allowing for amperage adjustments while welding.
