

## Tungsten EL. 2.4mm (10pcs/pack)

Item No.: 5321

### Product information

2.4mm tungsten electrodes, alloyed for TIG welding a variety of base materials; compatible with both AC and DC welding, with optimal performance in DC applications.

### Features

- Can be transported, stored, and disposed of without any legal limitations.
- Versatile tungsten electrode suitable for welding all types of materials, including carbon steel, stainless steel, nickel alloys, aluminum, magnesium, titanium, cobalt, and copper alloys.
- Offers superior ignition performance compared to thorium-alloyed electrodes.

### Specification

General:	Invent Hazard Material (IMO/EU) classification	NA
