

Total Hardness Test Kit

Tablet Count Method

Item no.: 161166424

A tablet is added to a 50ml or 100ml sample.

More tablets are added until a colour change happens to the sample. The number of tablets used to force the colour change are entered into a simple formula to obtain the test result.

Measurement-Range extendable by dilution:

10 - 500mg/l CaCO₃

Contents:

- Total Hardness Reagents 100 Tablets
- Black plastic carrying case with a foam insert
- 1 x 100ml shaker tube
- Plastic stirring rod
- Cleaning brush
- Printed manual
